

## v-Pass for EMC Documentum

Vorsite Corp., Last Updated May 2009

*The Vorsite v-Pass for EMC Documentum connector enables the migration or transfer of content between Microsoft® Office SharePoint® Server (MOSS) 2007 and Documentum*

Knowledge workers are familiar with communicating, coordinating and collaborating with each other in an immediate and as-needed manner. Frequent exchange, elaboration of ideas, and sharing best practices don't lend themselves to a formal process. Yet once an idea has reached a stage of maturity, it needs to flow through key stakeholders and adhere to processes and strict security requirements. Vorsite's technology is designed to enable collaboration and content control across back-end systems allowing companies to leverage the capabilities of their

advanced ECM platforms and the years of investments in processes, retention policies and compliance.

v-Pass for EMC Documentum enable the migration or transfer of content between Microsoft® Office SharePoint® Server (MOSS) 2007 and Documentum based on criteria set by the organization that indicate a change in the content's value or other criteria. This technology allows content conceived in a SharePoint document library to participate in complex workflows hosted by Documentum. In addition, retention policies can be applied to the content based on metadata or "value" change definitions by the organization.

All Vorsite SharePoint connectors or web parts, including v-Pass, use standards-based web services to ensure that users can directly access and manipulate information supporting key business processes quickly and easily, while preserving security and data integrity.

## Benefits

- **Quick-start your collaboration**

v-Pass fosters flexible collaboration through the functionality of Microsoft SharePoint Portal. Tight integration with Microsoft Office and the ability to easily manage workgroup collaboration, subscriptions, notifications, message boards and other collaboration tools enhances your teams' productivity.

- **Control and distribute critical documents**

v-Pass has been designed to provide easy and complete transfer of file contents and metadata from SharePoint to Documentum Content Server and back. This feature allows content authors to save significant re-entry of metadata and ensures metadata accuracy and integrity between SharePoint and Documentum systems. Delivers access to content and data from one easy-to-use familiar portal interface, with complete integration with the Microsoft Windows desktop.

## Key Features

- **Administrator configurable**

Connections, transfers and mappings are configurable through the simple SharePoint administrator interface.

- **Time-based transfers**

Transfers to enterprise content management (ECM) repositories can be configured for time, age or period based transfers.

- **Event-driven transfers**

Transfers to ECM repositories can be configured to fire on basic SharePoint events (such as check in, upload, new, etc.)

- **Retention policy compliant**

A simple configuration interface makes applying retention policies quick and easy.

- **Content versioning**

Multiple versions of files can be configured to transfer or to be excluded from transfer.

- **User-initiated transfers**

Users can be prompted to transfer files from the SharePoint file drop down menu.

- **Content metadata mapping**

File metadata in SharePoint can be correlated directly to the ECM repository metadata.

- **Archiving and long-term storage**

Shortcut links to files in your enterprise content management repository can either retrieve the file to SharePoint or be completely removed for added security.

#### Minimum Requirements

- Microsoft Office SharePoint Server 2007 SP1
- EMC Documentum 5.3 SP5, SP6, D6 & 6.5

#### How to Buy

The Vorsite v-Pass product is available for purchase through our sales representatives. To learn more about the **product, licensing, pricing, or a free 30-day trial**, please contact us at 206.781.1797 or toll free **1.800.218.7260**, email [sales@vorsite.com](mailto:sales@vorsite.com), or inquire on our website [Vorsite.com](http://Vorsite.com).

- **Snapshot transfers**

SharePoint administrators can copy all files from SharePoint to the ECM repository while maintaining the folder structure of SharePoint.

- **Business process integration**

With multiple configuration rules available, v-Pass fits right in with your business and technology processes. Enable business users to participate in business processes for the SharePoint interface that are defined and managed within the Documentum repository.
